**K-12 Outreach Activity**  
October or November, 2008 thru April, 2009  
University of New Hampshire, Durham  
Outreach activities for elementary, middle, and high school teachers and their classes include faculty visits to your school to give an introduction/overview to your faculty and/or your students. In addition arrangements can be made for high school teachers to bring their classes to UNH to tour the research labs of CHN faculty, participate in hands-on activities or an introductory nano-lab, and hear an overview slide show about nanotechnology. We have scheduled video conferencing presentations with the Granite State Distance Learning Network (GSDLN) in the past. If you are interested in such a presentation please let us know. School districts who are members of GSDLN or have video conferencing capabilities can participate by contacting George A Fryburg, Director of Programs and Services, Granite State Distance Learning Network, (603) 767-6374, George.Fryburg@unh.edu, www.gsdln.org. Contact Sue Greenberg for details. E-mail: Susan.Greenberg@unh.edu if interested in participating in faculty visits to your school or visiting UNH with your high school class.

**K-12 Outreach Activity**  
5th Annual K-12 Nanotechnology Teacher Conference  
Wednesday, April 8, 2009  
University of New Hampshire, Durham  
Our 5th annual K-12 Nanotechnology Teacher Conference will take place at Holloway Commons on the campus of the University of New Hampshire and is **FREE and open to all K-12 teachers** with a knowledge of or interest in science and technology. Whether you are new to the conference, or have attended in previous years, there will be talks and presentations that will peak your interest and expand your understanding of this new and rapidly expanding technology that promises to bring sweeping changes to the 21st Century. Contact Sue Greenberg for details. E-mail: Susan.Greenberg@unh.edu
